Life Line IMS

Life Line's IMS layout

Imagine the kind of ambulance interior you might get if you took the great ideas from experienced EMTs and committed the industry's leading designers and craftsmen to make them happen. Open the door to a Life Line Emergency Vehicle featuring the Next Generation of Ambulances and that's exactly what you'll find.

Life Line allows you to customize your IMS interior with a wide range of thoughtful, EMT-designed features:

- ★ A curb-side action area allowing you to stay seated while reaching for your equipment
- ★ A full size street-side squad bench with sharps and waste containers at the foot end and under-bench storage
- ★ Side body windows with sliding privacy/dry erase boards
- ★ Inside-outside access to the rear compartment
- ★ All drawers are within easy reach of seating positions and include adjustable dividers
- ★ A second patient control panel located at the rear end of the squad bench, allowing you to stay seated and maintain full control of the patient compartment
- ★ All Life Line cabinet shelves are securely fastened to eliminate shifting and noise and include a restocking feature with double-positive locks

Life Line's exclusive IMS features are available in all straight-side models. (Superliner interior shown here.)

When an idea comes along that will make your life easier, safer or more efficient, you'll see it in Life Line IMS interiors first.

- Environmental controls and radio / cell communications are at arm's length while you are seated.
- The curb-side bench or seat provides additional seat belt safety with ample room for the medic to move while caring for the patient.
- Medics have easy access to all of their equipment as well as padded drug storage drawers even while seated.

Life Line's IMS package also includes a number of premium exterior features:

- Two-inch-thick interlocking, double aluminum insulated floor for a quiet ride
- Three-inch-thick bank vault style compartment and entry doors that seal your equipment – and you – from the outside elements
- All interior door panels are custom-fitted to each door extrusion and are secured using machine screws and cage nuts.
- Gas damping struts are used on all exterior doors to minimize wear and allow for a greater than 90-degree door opening, making it easier to access all of your equipment.
- Two-by-three, two-piece, extruded lower body crash rails to minimize body damage
- The entire vehicle is insulated and wrapped in a 4 mil. vapor barrier, just like your home, to help reduce moisture and outside noise.
- Exterior compartment shelves are four-sided and include a light under each shelf.
- Compartments feature waterproof, easy-to-clean "Rhino Lining" that's easy on equipment and virtually indestructible.
- A reflective vinyl Chevron pattern that covers the entire rear body panel is available to dramatically improve night visibility for added safety.

- IMS interiors feature a combo 12v/110v heated cabinet to keep IV solutions or blankets warm
- The customer RFS/ALS stack features adjustable shelves that securely fasten in place to eliminate shifting and noise, as well as vented acrylic door inserts.
