

A very special day in Life Line History and for the future of the company.

We have purchased the Rockwell Building which sits beside us to the east, I have been working on this piece since March and we were able to keep it under tight confidentiality which is amazing for SMALL TOWN IOWA. Each step of the way we had to bring someone else into the mix and with all the key people involved we achieved this purchase at 3:30 pm on Tuesday, September 7<sup>th</sup>.

THIS IS AN OPPORTUNITY OF A LIFETIME. It will end all the band-aids that we have experienced since the beginning on railroad, being on both ends of town and outgrowing our current building. The Rockwell building is 155,000 square feet. With 127,000 square feet of concrete parking. Upgraded state of the art electrical worth one million plus tons of extras.

For Life Line this will allow us to have all production under one roof and the current building will be for chassis storage, QA, Finish and most of the offices. This will allow us to get into LEAN MFG, TAKING HOURS OUT OF THE TRUCKS and SAVE ALL THE TRIPS BACK AND FORTH to name a few. The building will allow 40 to 45 trucks to be built in it's vast space and this should end our building projects forever.

We are excited to have the opportunity to show all of you this wonderful building. We continue to look into the future & moving forward. Thank you for being a part of the family & welcome to our new home.

Yours in EMS,

Connie Leicher  
President
