

It's the next best thing to a new Life Line.

Remounts

Choosing a Remount consumes fewer resources & produces less waste!

Our customers know that the next best thing to a new Life Line ambulance is a factory rebuilt Life Line Remount. Remounts and repairs are a major part of our business, with an entire plant dedicated to doing nothing else. It's staffed by some of our most experienced and dedicated technicians who see their mission the same way: bringing every vehicle they touch up to the same high standards found in every Life Line Emergency Vehicle.

- Life Line is a true custom builder. That means that every "remount" is, in fact, a completely refurbished vehicle, from the ground up.
- Life Line remounts are the product of specialists who work carefully in stages dictated by vehicle need, not assembly line timing.
- Our process includes an inspection of more than 50 components and assemblies to ensure that any worn out item is repaired or replaced.
- Life Line remanufactured vehicles deliver substantial savings without sacrificing anything when it comes to serviceability, safety or comfort.
- Every Life Line-refurbished vehicle includes a two-year limited warranty.
